

ORGANIC ULTRA PREMIUM PCR HEMP OIL EXPLAINED

All Super Snouts Full Spectrum and Isolate Hemp products are organic.
All of our hemp is sustainably farmed.

FULL SPECTRUM PHYTO 90/150/300

PHYTO90 has approx. 90mg of full spectrum raw material full plant extract and 27,910mg of certified organic virgin hempseed oil, making the finished product 99.7% organic. The raw extract cannot be considered organic since it has been through an extraction process and is considered a compound, not a full ingredient.

PHYTO150 has approx. 150mg of full spectrum raw material full plant extract and 27,850mg of certified organic virgin hempseed oil, making the finished product 99.5% organic. The raw extract cannot be considered organic since it has been through an extraction process and is considered a compound, not a full ingredient.

PHYTO300 has approx. 300mg of full spectrum raw material full plant extract and 27,700mg of certified organic virgin hempseed oil, making the finished product 99% organic. The raw extract cannot be considered organic since it has been through an extraction process and is considered a compound, not a full ingredient.

Our Colorado supplier for the FULL SPECTRUM full plant oils grows all crops under strict organic farming practices. The extracted compounds from that plant material is then blended with virgin certified organic hempseed oil, making the finished product 99%+ organic.

HPLC and GC FID confirms that our Full Spectrum products are free of: Solvents, THC, GMO, Heavy Metals, Pesticides, Herbicides, Parasites and Mold.

99%+ PURE ISOLATE ISOHEMP 150/300

ISOHEMP-150 has approx. 150mg of 99%+ Pure Isolate extract and 27,850mg of certified organic hempseed oil, making the finished product 99.5% organic. The raw extract isolate cannot be considered organic since it has been through an extraction process and is considered a compound, not a full ingredient.

ISOHEMP-300 has approx. 300mg of 99%+ Pure Isolate extract and 27,700mg of certified organic hempseed oil, making the finished product 99% organic. The raw extract isolate cannot be considered organic since it has been through an extraction process and is considered a compound, not a full ingredient.

Our Kentucky supplier for the ISOHEMP (99%+ Pure Isolate) oils grows all crops without any pesticides and/or herbicides. The Co2 extracted 99%+ Pure Isolate from that plant material is then blended with certified organic hempseed oil resulting in a finished product that is 99%+ organic.

Third party testing and verification ensure that our Isolate products are free of: Solvents, THC, GMO, Heavy Metals, Pesticides, Herbicides, Parasites and Mold.
